

Common GPU Execution Framework

```
graph TD; A[Common GPU Execution Framework] --> B[GPU_Opt]; A --> C[GPU_Opt_Pure]; A --> D[GPU_Opt_Pure_Chunked];
```

GPU_Opt

Unified Memory

Managed allocation
Host/HBM placement

GPU_Opt_Pure

Device-Only Memory

Device allocation
Capacity-bound
working set

GPU_Opt_Pure_Chunked

Source Sub-Batching

Limits resident
source state
Full graph reused

**Memory-management variants of one framework -- not three independent proposals.
Chunked partitions the source set, not the input graph.**
